

THE ROADMAP

Pension Plan token

The Pension Plan token was launched on the Ethereum network on the 4th of October.

It has the newest technology of coding, which allows high redistribution of 7 % to its holders in Ethereum.

Further more the Pension Plan contributes with 1 % towards clinical research and buyback of 0.5 % shrinks the supply constantly.

This token is perfect for passive income and the goal of the project is to create platform, which would allow holders to pay directly by debit card with redistributed Ethereum during daily live.

Why should you invest in the Pension Plan token?

1. Pension Plan uses a system of redistribution from all transactions

Pension Plan uses a system of redistribution from all transactions. This deduction of 12 % from every transaction makes it very hard for short trading or bot's engagements. Therefore, investors understand, that this token is made for long-term holding.

2. Doxxed devs constantly bring more investors

It is always work for the developers to constantly bring more investors to Pension Plan. This will result in an increase in token price and will accumulate in your Crypto wallet. It is easy getting used to reflection after reflection, paid in Ethereum. Not only will this encourage holders, growth and stability, you will want to keep adding more Pension Plan to receive even more Ethereum each redistribution.

3. Burned forever and liquidity locked

Furthermore, we improved the code of Pension Plan by implementing a 0,5 % buyback, which burns the tokens forever and decreases the circulating supply. Constantly shrinking the supply should have positive impact on the Pension Plan token price

Redistribution of the 12 %

The code of Pension plan is unique and was built by our team. You will not find anything with the same functionalities. This ERC-20 token works best, when you hold it in your wallet, which guarantees you receiving the redistribution. The redistribution is initiated, when 1 ETH is collected from all transactions.

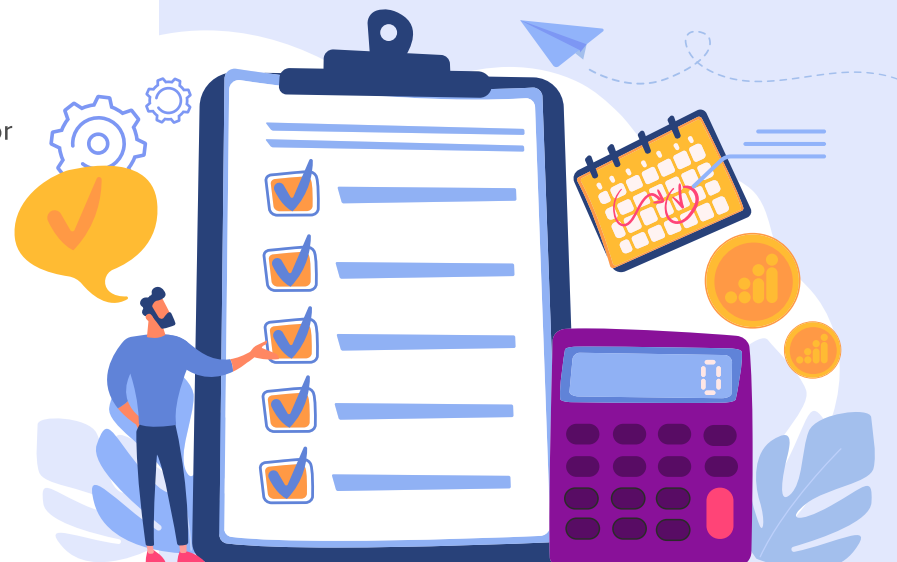

- 7 %** reflection to holders in ETH
- 2 %** sent to a marketing wallet in ETH, which is used for advertising purposes and payments for listing on different CEXs
- 1 %** sent to developers in ETH, these finances are used as additional liquidity for marketing and services directly related to Pension plan
- 1 %** sent to cancer research ETH
- 0,5 %** of Pension Plan tokens are sent to a burn address, which removes this liquidity from circulating supply forever
- 0,5 %** in ETH is used to burn Hachiko Inu tokens, to further support the Hachiko Inu Ecosystem

Audit

Pension Plan token is undergoing audit from TechRate. When the results of the audit will be known, it will be published on:

Pension plan - Roadmap

This roadmap is an interactive plan, which highlights the milestones, that we want to achieve.

Phase 1 Launch

In progress

- ✓ Pension Plan Coin launch
- ✓ Website pensionplan.finance launch
- ✓ Etherscan social information update
- ✓ Social media registration (Facebook, Instagram, Telegram, Twitter)

Phase 2 Community

Pending

- ✦ Create and publish memes
- ✦ Collaborate with community on social media
- ✦ Giveaway and competition for best community promo
- ✦ First donation for Cancer research

Phase 3 Social media

Pending

- ✦ Coingecko.com registration
- ✦ Publish article at Yahoo Finance and MarketWatch
- ✦ Project reviewed by famous influencers
- ✦ Launch Youtube channel

Phase 4 Exchanges

Pending

- ✦ Publish full audit of Pension Plan Coin
- ✦ Get Pension Plan Coin listed on exchanges (Hotbit, IndoEx)
- ✦ Allow staking system on exchanges
- ✦ Apply for Coinmarketcap.com listing

Phase 5 Ecosystem

Pending

- ✦ Continue donations for Cancer research
- ✦ Get Pension Plan Coin listed on Hachiko Inu Exchange
- ✦ Holders can pay with their 7 % reflection with debit card
- ✦ Complete all steps on this roadmap and create a new roadmap
